

welcome aboard

QUISITE
YACHTS
— LUXURY FOR CRUISERS —

Xquisite Yachts was established in 2014 with the purpose of creating a new brand of sailing and power catamarans.

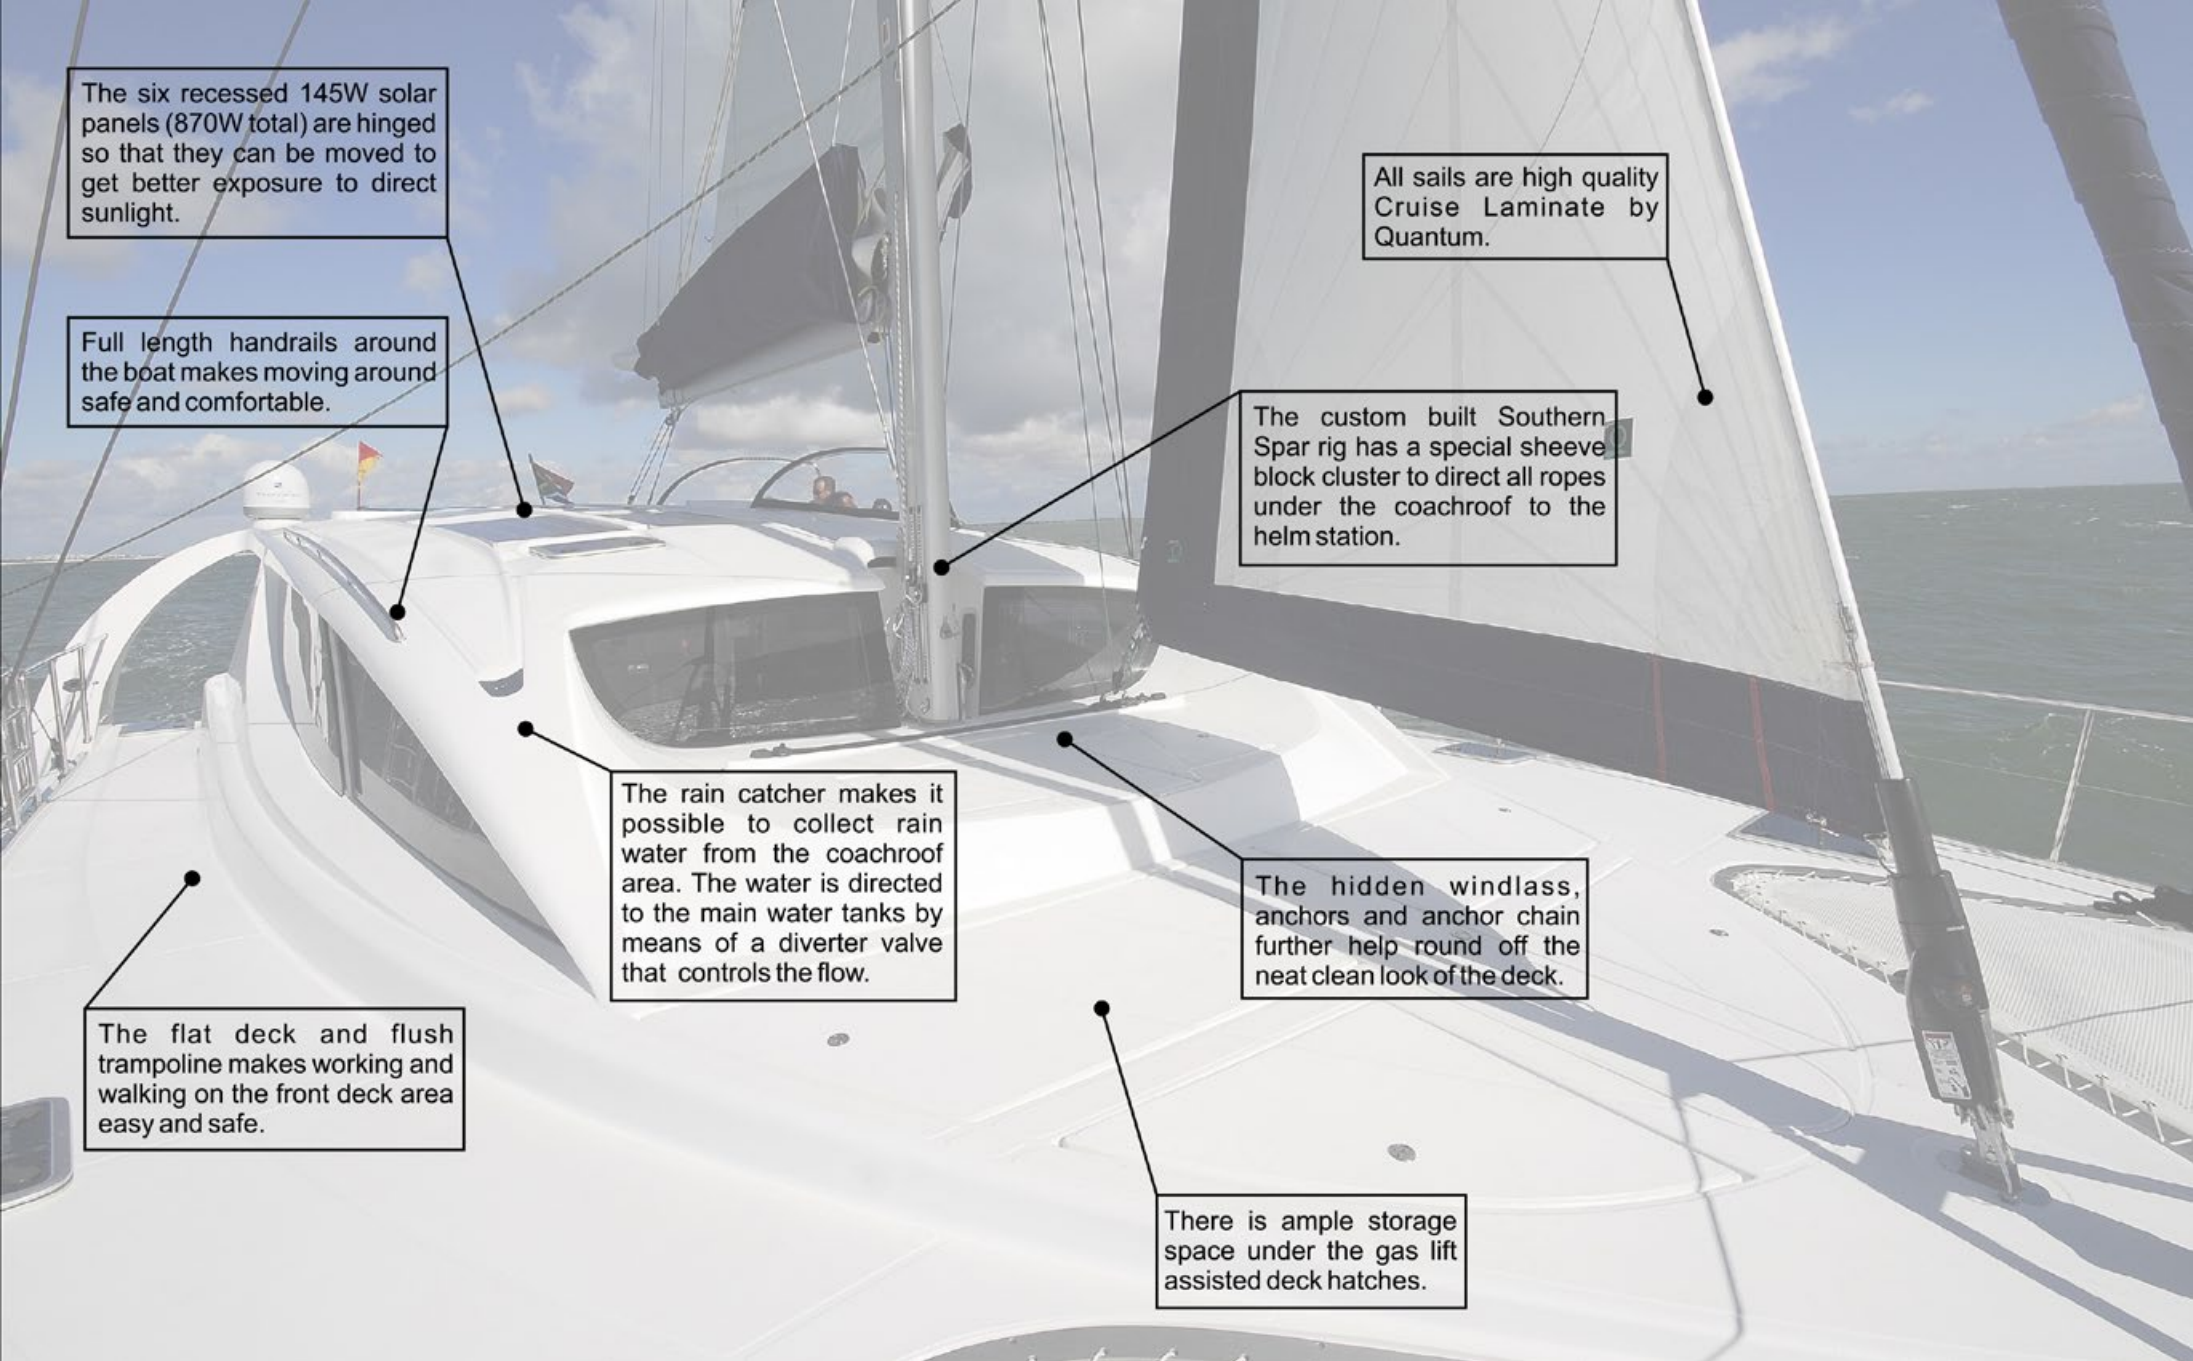

Our goal was to create the ultimate luxury yacht for cruisers, where safety and innovative design blends together, offering unmatched comfort for adventurers who wish to explore our oceans without giving up their comfortable lifestyle.

Our yachts are built in Cape Town, by a team of highly experienced catamaran builders managed by Colin Etheridge (former GM of Robertson & Caine), and are marketed globally and exclusively under the brand, Xquisite Yachts.

All our vessels are designed for comfort and easy sail handling, including two headsails, electric winches and davits, and are equipped with generator, air-conditioning, water maker, washing machine and digital switching as standard truly supporting comfortable, extended blue water cruising

The superb sailing performance of our yachts is crated by the use of light weight construction materials, such as high-density foam core and vacuum infused epoxy resin, Our yachts are built to CE and category A offshore certification while great performance under power is guaranteed by the twin 80HP Yanmar engines.

/// OUR COMPANY

The six recessed 145W solar panels (870W total) are hinged so that they can be moved to get better exposure to direct sunlight.

Full length handrails around the boat makes moving around safe and comfortable.

All sails are high quality Cruise Laminate by Quantum.

The custom built Southern Spar rig has a special sheeve block cluster to direct all ropes under the coachroof to the helm station.

The rain catcher makes it possible to collect rain water from the coachroof area. The water is directed to the main water tanks by means of a diverter valve that controls the flow.

The hidden windlass, anchors and anchor chain further help round off the neat clean look of the deck.

The flat deck and flush trampoline makes working and walking on the front deck area easy and safe.

There is ample storage space under the gas lift assisted deck hatches.

This unique program is offered to you by our charter division, Xta-Sea Charters, on board our award winning sailing catamaran, PEARL.

We would invite you and your family for an all inclusive sailing charter, which will be custom tailored for you to be able to test sail our boat while at the same time you can experience the luxurious lifestyle she offers.

As PEARL is constantly on the move, you will have the opportunity to test sail with us in the Virgin Islands, The Bahamas, Mexico or Belize for up to four guests. Available dates and destinations will depend on our charter schedule.

The price of this all inclusive package will be fully refunded in case you would decide to purchase any of our boats.

Xquisite Yachts is offering a very unique "in-house" financial structure in order to give you the maximum peace of mind regarding your investment.

The usual method with small boat yards is that the buyer is financing the construction himself, depositing progress payments directly to the boat yard. This structure involves a huge risk for the buyer, as small boat yards could experience economic problems which could hugely delay the construction or the buyer could end up with an unfinished hull or even worse, his entire investment could be lost.

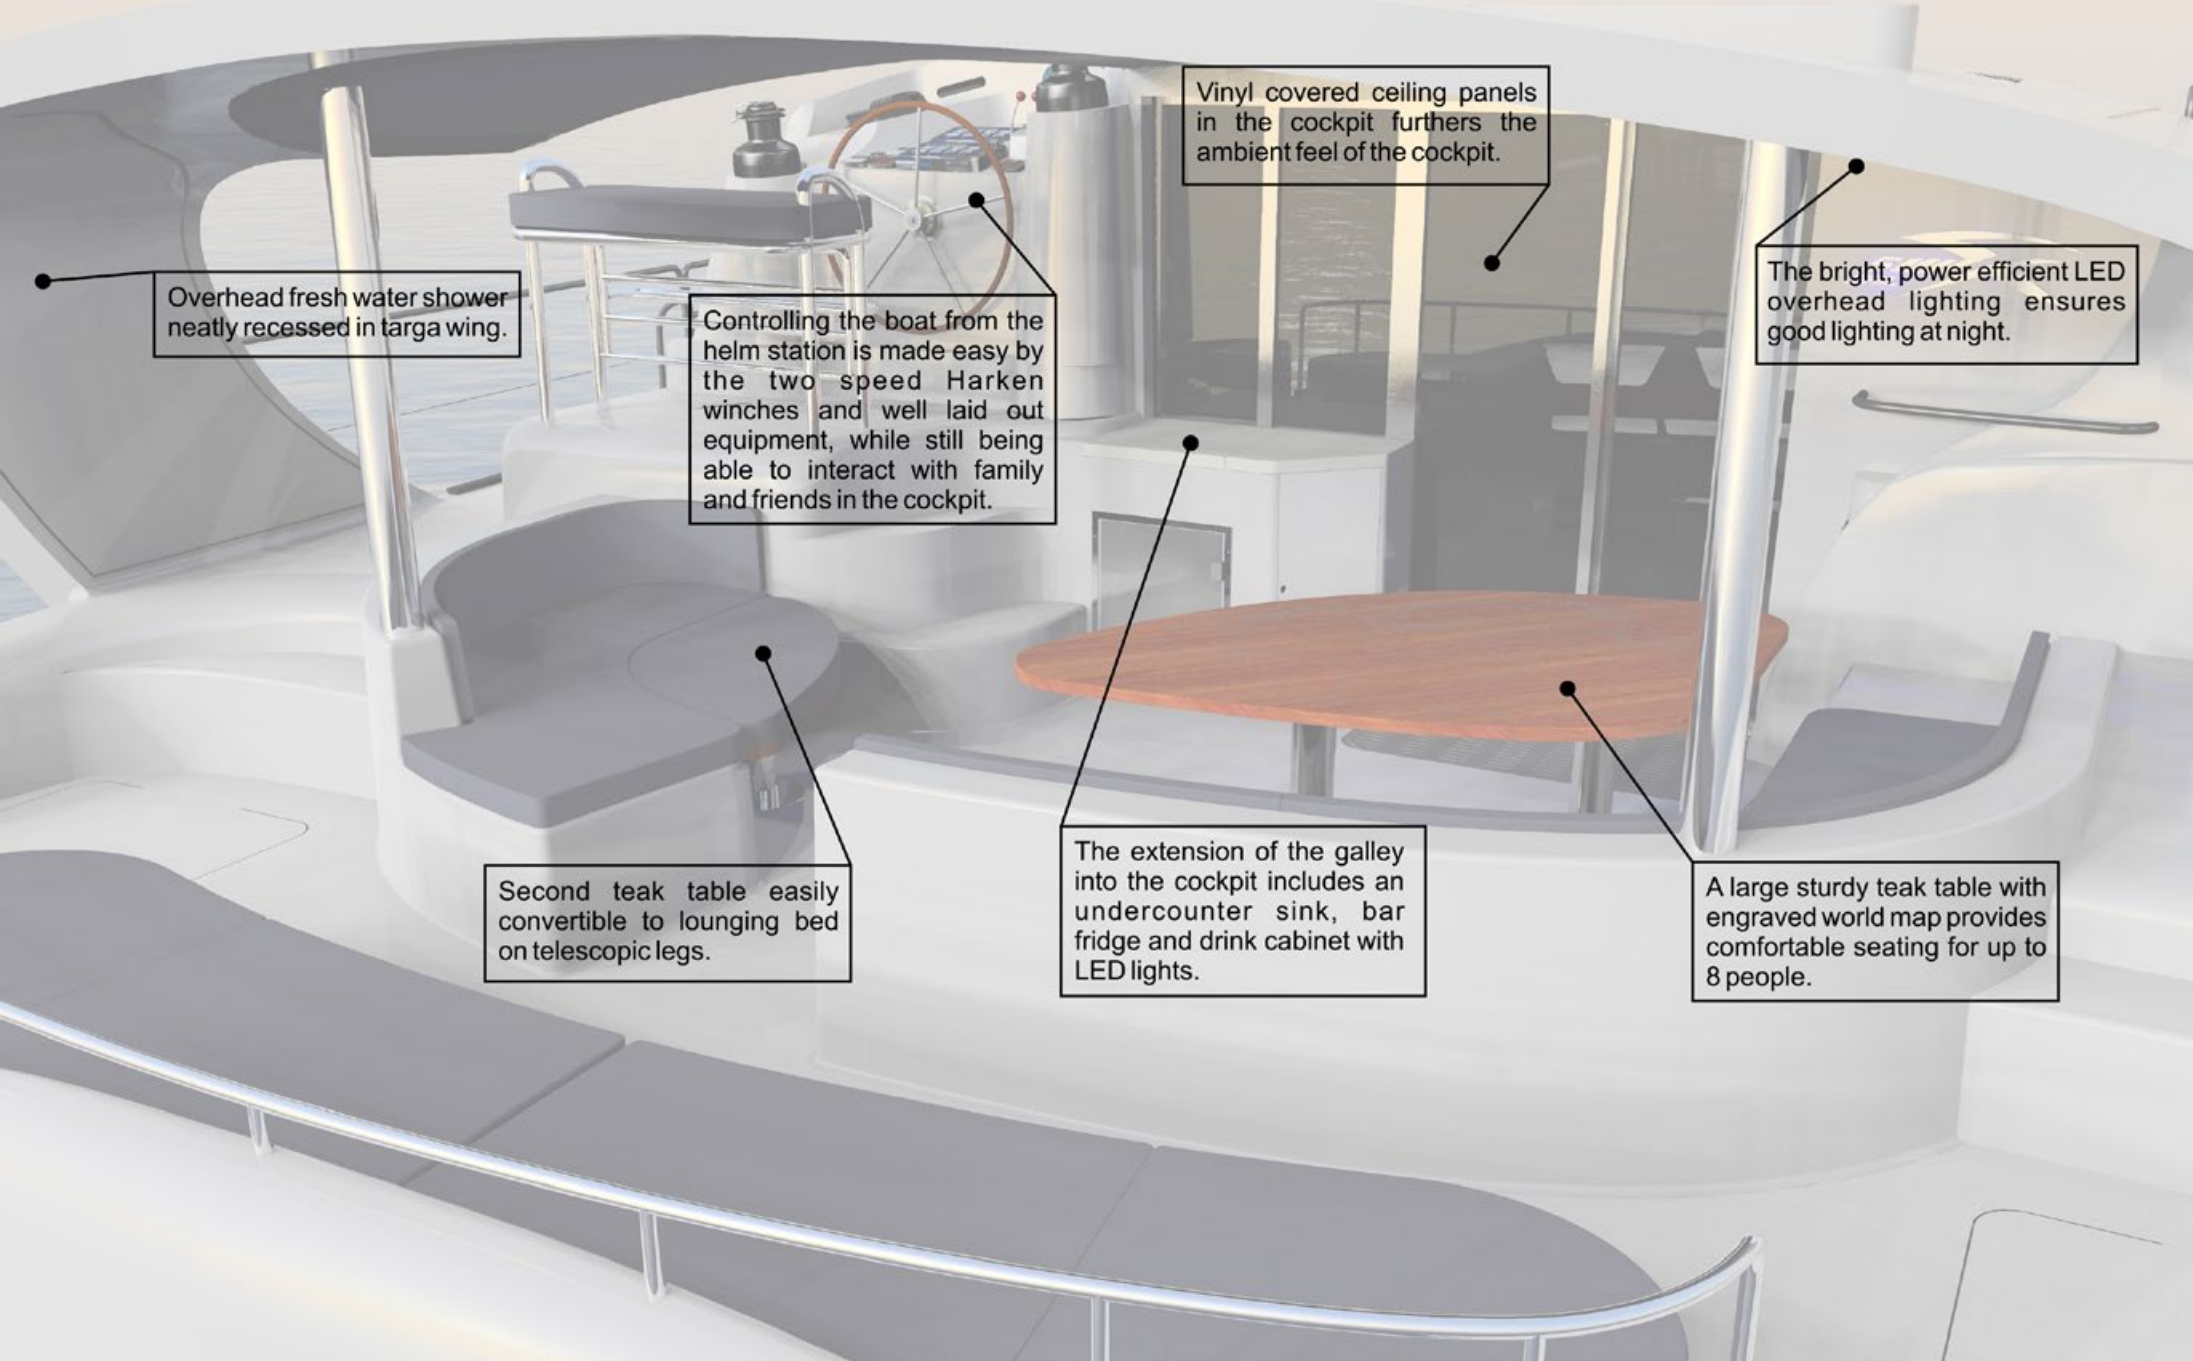

Our "in-house" financing structure offers you the ability to deposit the construction progress payments into an independently held escrow account. The moneys will only be released to us once the handover is completed at the agreed time and quality.

This unique structure is the safest payment method that exists in the industry, and it's a limited offer on the first 5 new orders, including both standard and custom versions of all our models.

Although all our yachts are equipped for serious blue water sailing as standard and the choice of two different interior finishes comes at no additional cost, our "in-house" design team allows us the flexibility to offer both standard and fully custom versions of all models, adapting to the needs of our clients, with the professional guidance of our dedicated design team.

Overhead fresh water shower neatly recessed in targa wing.

Controlling the boat from the helm station is made easy by the two speed Harken winches and well laid out equipment, while still being able to interact with family and friends in the cockpit.

Vinyl covered ceiling panels in the cockpit furthers the ambient feel of the cockpit.

The bright, power efficient LED overhead lighting ensures good lighting at night.

Second teak table easily convertible to lounging bed on telescopic legs.

The extension of the galley into the cockpit includes an undercounter sink, bar fridge and drink cabinet with LED lights.

A large sturdy teak table with engraved world map provides comfortable seating for up to 8 people.

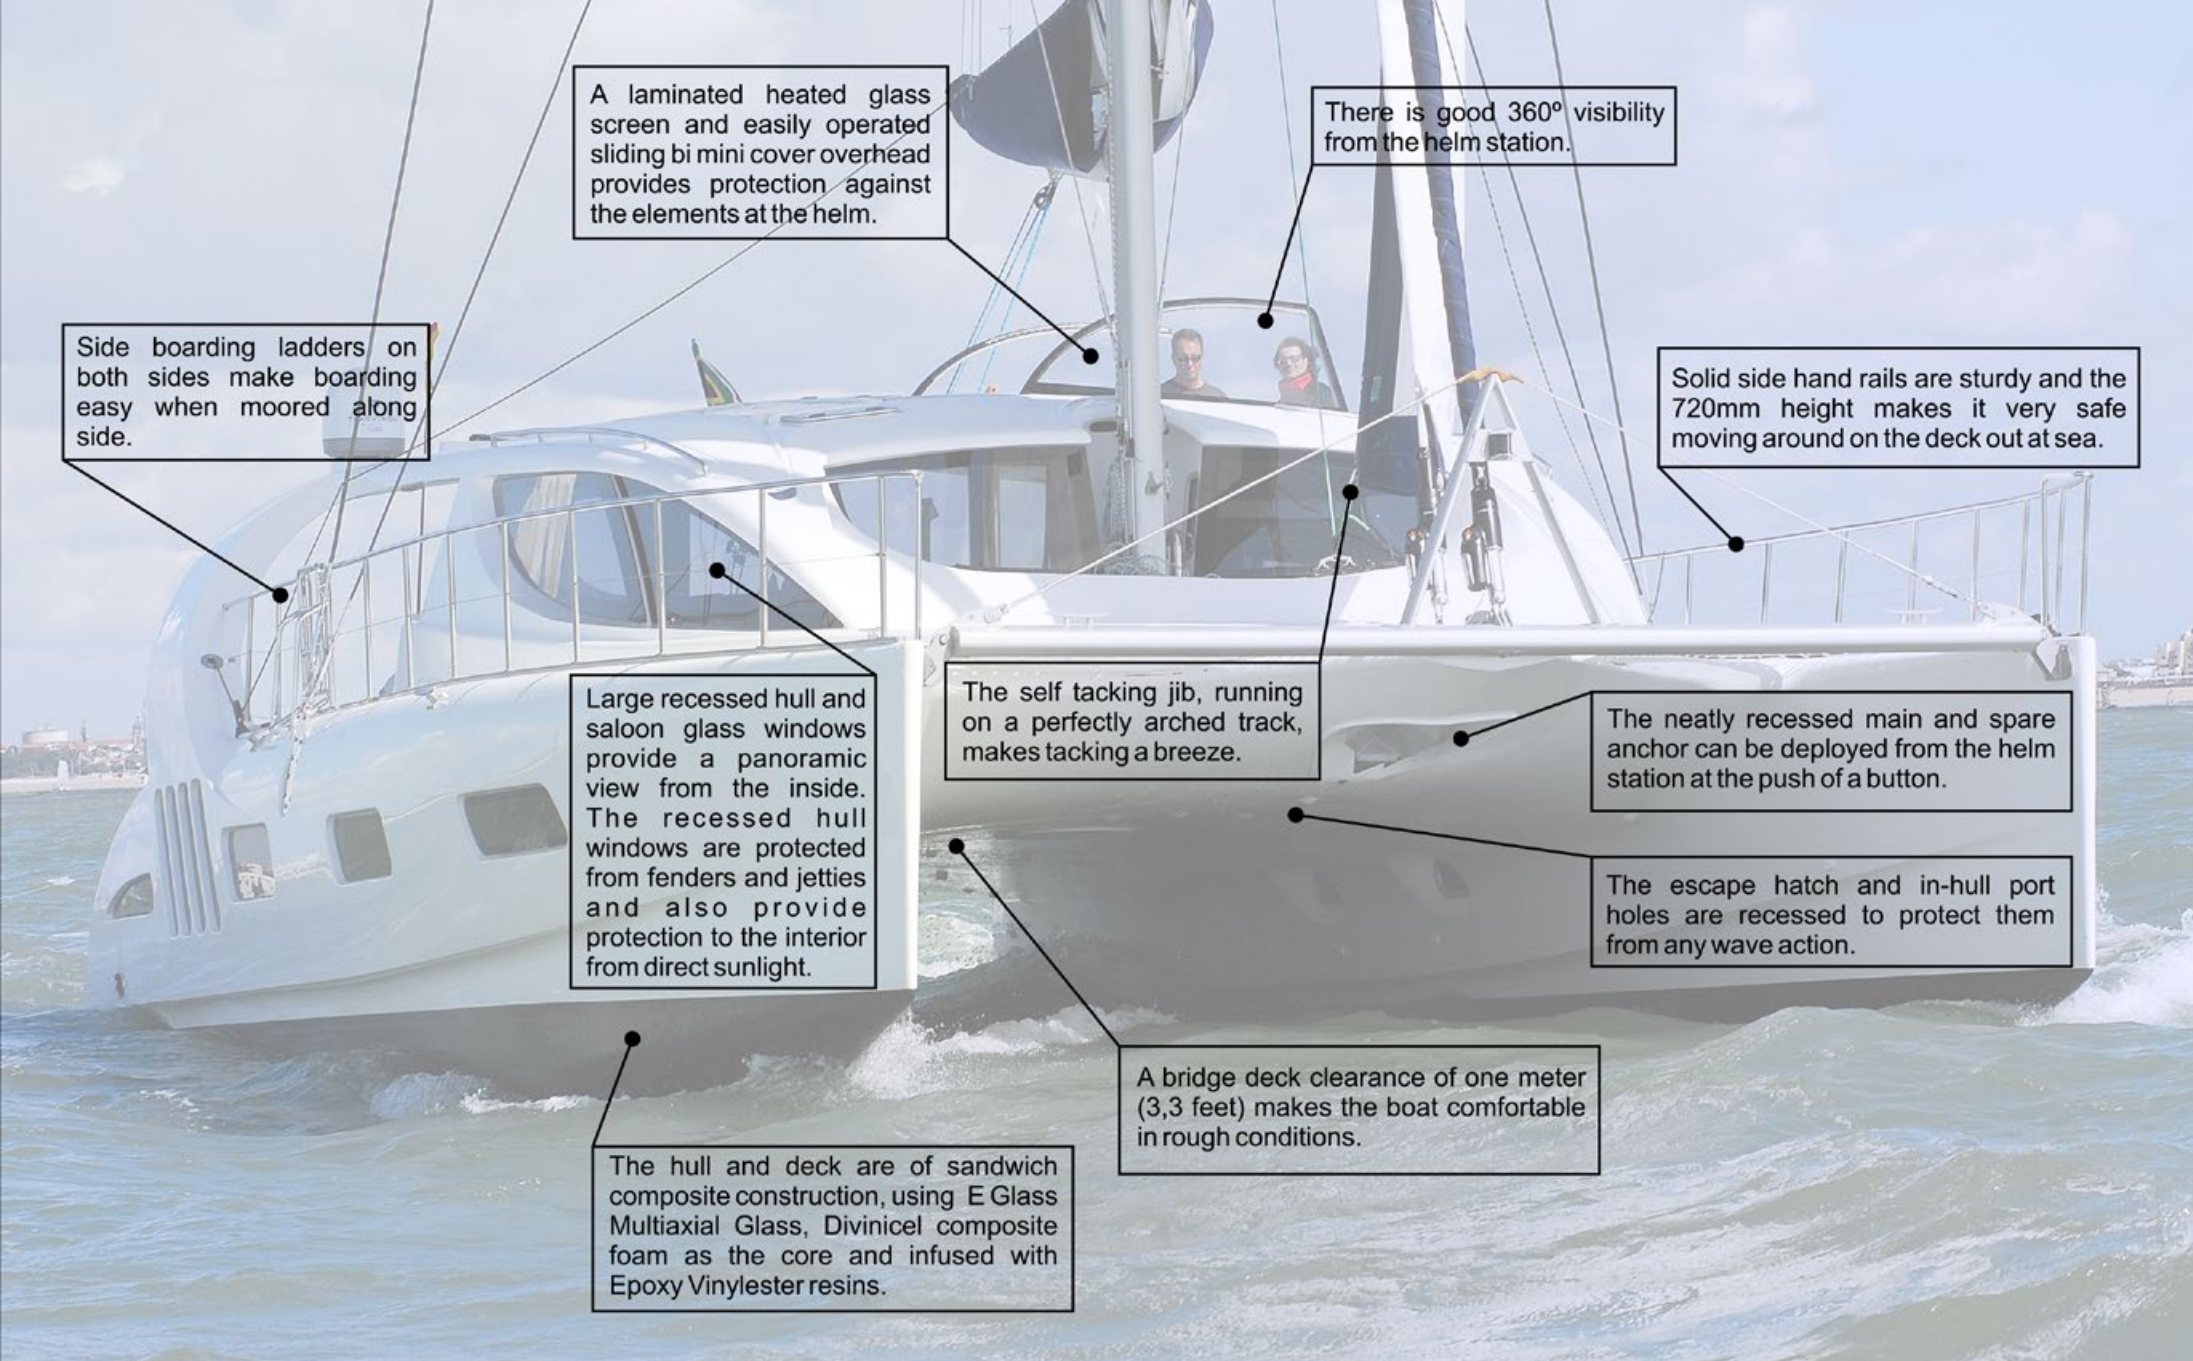

A scenic view of a rocky coastline. The foreground is dominated by deep blue water with gentle ripples. The middle ground shows a rugged, light-colored rock face that curves along the water's edge. The top of the cliff is covered in dense, vibrant green vegetation. The overall atmosphere is serene and natural.

STANDARD EQUIPMENT

- Twin 80HP Yanmar engines with NMEA2000 interface
- Two headsails on furlers
- Electric winches and davits
- 12KW generator
- High tech 2V gel batteries
- 2.5KW inverter / 200A battery charger
- 870W solar panels
- Full Garmin navigation electronics
- Full air conditioning 52,000 BTU
- Water maker
- Washing machine
- Bar fridge and ice maker
- C-ZONE digital switching
- Dimmable SMART GLASS technology on windows
- 40" LED TV on electromechanical lifting system
- Multi zone FUSION stereo system
- iPad with docking station, connected to digital switching and navigation system via wi-fi'

A laminated heated glass screen and easily operated sliding bi mini cover overhead provides protection against the elements at the helm.

There is good 360° visibility from the helm station.

Side boarding ladders on both sides make boarding easy when moored along side.

Solid side hand rails are sturdy and the 720mm height makes it very safe moving around on the deck out at sea.

Large recessed hull and saloon glass windows provide a panoramic view from the inside. The recessed hull windows are protected from fenders and jetties and also provide protection to the interior from direct sunlight.

The self tacking jib, running on a perfectly arched track, makes tacking a breeze.

The neatly recessed main and spare anchor can be deployed from the helm station at the push of a button.

The escape hatch and in-hull port holes are recessed to protect them from any wave action.

A bridge deck clearance of one meter (3,3 feet) makes the boat comfortable in rough conditions.

The hull and deck are of sandwich composite construction, using E Glass Multiaxial Glass, Divinice composite foam as the core and infused with Epoxy Vinylester resins.
